EXPERIENCE

Front-end developer Intern, GAO RFID Inc.

Nov 2023 - Feb 2024

Technologies: JavaScript, WordPress

Toronto, ON

- Developed e-commerce pages and website templates by leveraging WooCommerce and Elementor plugins with a collaborative team of 20 members.
- Implemented and integrated the Mega menu using the Max Mega Menu plugin, integrating JavaScript and PHP code to add tabs within the menu.
- Built the Ajax search using the FiboSearch plugin to make the user experience more smooth and simple.

Front-end developer Intern, Tellex Inc.

Feb 2023 - Jul 2023

Technologies: React, TypeScript, Next.js, WordPress

Vancouver, BC

- Implemented the progression of contemporary website development through the adept utilization of WordPress, Elementor Pro, and JavaScript to ensure a sophisticated and seamless user experience.
- Accomplished 20% enhancement in website loading speed through the judicious selection and integration of suitable plugins, thereby optimizing overall performance.
- Innovatively designed and implemented a new manipulation function, while concurrently overseeing system design in TypeScript and Next.js for heightened efficiency and functionality.

Front-end developer Intern, One Community Global

Mar 2023 - Apr 2023

Technologies: HTML, CSS, JavaScript

San Gabriel, CA

- Created new functions to enhance the user experience using JavaScript and redesigned a simple and functional application form with HTML/CSS.
- Managed website versions and task management functions to attract potential clients, updating user information with JavaScript.

PROJECTS

Chat App

The Chat App is a Next.js-based application that connects with MongoDB through Prisma. Users can create an account and select other users to initiate either a one-on-one chat room or a group chat.

Tech Stack: Next.js, MongoDB, Prisma

Health Management App

The Health Management App is a React-based application that utilizes MongoDB. Users can manage appointments and apply to see doctors. Notifications guide users through each screen.

Tech Stack: React, Node, Express, MongoDB
